EDUCATION

The Hong Kong University of Science and Technology
BEng in Computer Engineering
(2022 - 2025)

Hong Kong Community College
Associate in Statistics and Data Science
(2020 - 2022)

AWARDS

- Director's List 2021 from HKCC
- PolyU HKCC Outstanding Student Award 2021 (Silver Award)

SKILLS

- C/C++ programming
- Python programming
- Java with spring boot
- Kotlin with Jetpack Compose
- SQL
- Basic HTML
- Basic CSS
- Basic ReactJS
- MS office

PROFILE

As a graduate in Computer Engineering, I am proficient in multiple programming languages and frameworks. Specifically, I have experience in coding with C++, and Java, utilizing Spring Boot to develop backend, including the creation of RESTful APIs. Additionally, I have basic knowledge in frontend development, including HTML, CSS, and ReactJS. Furthermore, I excel in problem-solving with AI and other tools, enabling me to resolve issues independently. I am passionate about the IT industry and eager to develop my expertise in this field.

PROJECT EXPERIENCE

Online QR Code Generator

A website that supports the generation of customized QR codes and 1D barcodes.

Key Skills Used

- JAVA programming for backend
- ReactJS, TypeScript, NEXT.JS for frontend

Forum Moblie App (Android)

An Android app that supports basic forum functions such as creating accounts, uploading posts, deleting posts, and making comments.

Key Skills Used

- Kotlin with Jetpack Compose as programming language
- Firebase as database
